

## **FANS-SPACE– ‘Your voice, Your passion; recognized’**

### **Problem:**

**Fans can only watch.** They can not make decisions or influence the organizations that they love and support every week throughout a season. There is almost no system in place for influencing a team's decisions and there is no way to transition from a fan to an active participant.

Historically Gaining this voice through direct investment in a specific team is not feasible for the vast majority of fans, with the barrier being immense to the point of being insurmountable.

eg.(time, funding, talent acquisition ability)

### **Solution:**

**Fans-Space** is a decentralized application platform designed for the sports fans, where fans can get direct votes into their favorite sports team by owning unique tokens for their sports teams, this allows fans to be able to pool votes based on decisioned that they would like the club to make for eg. (new manager, player trade/purchase/sale). Better loyalty programs that would be accessible to fans on a world wide scale, signed gear reserved for token holders.

## Benefits:

- Wider loyalty programs for fans
- Voting power for token holders to influence team decisions and other perks.
- Strengthen Fan Engagement
- Lifetime access to exclusive fan clubs/superfans; not like membership
- Trade tokens with other holders in the market.
- Increase revenue from token sales and fans base

A total of 35 Token Contracts found
